

Basic Script for Reprocessing of Medical Devices

TABLE OF CONTENTS

Part I: General Hygiene (*Buchrieser, Miorini*)

- 1 GENERAL HYGIENE
 - 1.1 Personal hygiene
- 2 HAND HYGIENE
 - 2.1 Fundamentals
 - 2.2 Hand hygiene measures
 - 2.2.1 Principle of non-contamination
 - 2.2.2 Gloves
 - 2.2.3 Hand washing and drying
 - 2.2.4 Hygienic hand disinfection
 - 2.2.5 Hand care

Part II: Fundamentals of Microbiology and the Science of Infection (*Buchrieser, Miorini*)

- 1 FUNDAMENTALS OF MICROBIOLOGY
 - 1.1 Microorganisms (smallest living creatures)
 - 1.1.1 Where microorganisms are to be found
 - 1.1.2 Bacteria
 - 1.1.3 Viruses
 - 1.1.4 Fungi
 - 1.1.5 Protozoa
 - 1.1.6 Prions
- 2 THE SCIENCE OF INFECTION
 - 2.5 How are infections caused?
 - 2.5.1 Basic model for transmission of infectious diseases
 - 2.6 Infection sources
 - 2.7 Infection routes
 - 2.8 Pathogens causing hospital infections

**Part III: Fundamentals of Cleaning, Disinfection and Sterilization
(Buchrieser, Miorini)**

1	TERMS
1.1	Cleaning
1.2	Disinfection
1.3	Sterilization
2	CLEANING
2.1	Detergents and methods of cleaning (summary)
3	DISINFECTION
3.1	Chemical disinfection
3.2	Thermal disinfection
3.3	Chemothermal disinfection processes
4	STERILIZATION
4.1	Before sterilization
4.2	Steam sterilization
4.3	Other sterilization processes
4.4	Storage of sterile medical devices
4.5	Withdrawal of sterile medical devices
4.6	Sterilization of single-use devices
4.7	Flash sterilizers

Part IV: Occupational Safety for Medical Device Reprocessing (*Enko*)

1	INTRODUCTION
2	HAZARDS IN THE CSSD
3	WORKING MATERIALS
3.1	Working materials / labelling
3.2	Hazardous working materials / explosive environments
3.3	Safety data sheets
3.4	Briefing / working materials
3.5	Working appliances
4	EMPLOYEES DUTIES
5	VACCINATIONS
6	PERSONAL PROTECTIVE EQUIPMENT (PPE)
6.1	Disposable gloves
6.2	Orofacial protection
6.3	Eye protection
6.4	Protective clothing
7	BRIEFING
8	WORKPLACE ACCIDENT
8.1	What is a workplace accident?
8.2	What is a near accident?
8.3	Accident prevention
9	HAZARDS POSED BY SPECIAL PATHOGENS
10	INSTRUCTION SHEETS
10.1	Instruction sheet - HIV
10.2	Instruction sheet – Hepatitis B
10.3	Instruction sheet – Hepatitis C
10.4	Instruction sheet – Procedure for contact with biological materials
11	ANNEX
11.1	Briefing sheet

Part V: Introduction to Quality Management (*Buchrieser*)

1	INTRODUCTION
2	INTRODUCTION TO QUALITY MANAGEMENT
3	TERMS RELATED TO THE TOPIC OF QUALITY MANAGEMENT
4	QUALITY MANAGEMENT PHILOSOPHY
5	RESPONSIBILITY FOR QUALITY
6	PROCESS MANAGEMENT
7	PROCESS-ORIENTED WORKING – PROCESS MANAGEMENT
8	MEDICAL DEVICE CIRCUIT
9	WHAT IS NEEDED FOR FUNCTIONAL QUALITY MANAGEMENT?
10	DOCUMENTATION
11	ANNEX: SPECIMEN STANDARD OPERATING PROCEDURE

Part VI: Sterile Supply Packaging (*Enko*)

1	INTRODUCTION
2	SELECTING THE PACKAGING
3	PACKING LISTS
4	TYPES OF PACKAGING
4.1	Sterile barrier system
4.2	Protective packaging
5	PACKAGING MATERIAL
5.1	Reusable sterilization containers
5.2	Flexible packaging
5.3	Packing aids
6	MATERIAL SCIENCE
6.1.	Plastic composite film
6.2.	Sterilization paper
7	SEALING
7.1	The sealing process
7.2	Releasing the sealing device
7.3	Impulse or bar sealing devices
7.4	Rotary sealing machines
8	VALIDATION
8.1	Installation qualification
8.2	Functional qualification
8.3	Performance qualification
9	PRACTICAL EXERCISES

Part VII: Fundamentals of Instrumentation (*Hauser*)

1	INTRODUCTION
2	DESIGNATION AND CLASSIFICATION OF INSTRUMENTS
2.1	Designation based on persons
2.2	Designation based on function
2.3	Designation based on characteristics
2.4	Designation based on shape
2.5	Designation based on organs
2.6	Classification of instruments as per surgical specialism
2.7	Classification of instruments as per intended use
3	TYPICAL CHARACTERISTICS OF SURGICAL, ANATOMICAL AND ATRAUMATIC INSTRUMENTS
3.1	Jaw surfaces of instruments
3.2	Hard metal inserts
3.3	Ratchets
3.4	Scalpels and knives
4	TISSUE DISSECTING INSTRUMENTS
4.1	Scissors
4.2	Chisels
5	TISSUE GRASPING INSTRUMENTS
5.1	Tweezers
5.2	Clamps
5.3	Forceps
6	TISSUE RETRACTING INSTRUMENTS
6.1	Wound hooks and wound retractors
7	TISSUE APPOSING INSTRUMENTS
7.1	Needle holders
8	TISSUE PROTECTING INSTRUMENTS
9	TISSUE PROBING INSTRUMENTS
9.1	Probes
9.2	Bougies and dilators
10	IMPLANTATION INSTRUMENTS
10.1	Suctions devices
11	SOME EXAMPLES OF INSTRUMENT TRAYS

12	TESTING AND CARING FOR INSTRUMENTS
12.1	Testing instruments
12.1.1	Cleanliness
12.1.2	Stain formation
12.1.3	Corrosion
12.1.4	Functionality
12.2	Caring for instruments

**Part VIII: Introduction to the Science of Law for Healthcare Sector
Employees (*Marzi*)**

1	Basic terms of the science of law
2	Basic terms of the constitution
3	Legislation
4	Introduction to civil law
5	The treatment contract
6	Patient rights
7	Compensation law
8	Interface between hospital law, professional law and occupational law
