Expert in Sterile Medical Devices versus manager CSSD: The Dutch Model

- Differentiating the CSSD manager and sterilisation expert roles within the Dutch governance model
- Grounding the dual-role concept in practical field experiences from Dutch sterilisation departments
- Weighing patient, surgeon, and management perspectives on responsibility separation in sterile services

For me does the Dutch model work

The differentiation of the roles within our Dutch governance role makes the quality and capacity better

Together we weigh patient, surgeon, experts, technician and management perspective

We respect each point of view and keep the quality of sterile medical devices moving forward each day
