

## **Letter of motivation**

My certain belief in the importance of international cooperation to raise standards in medical device reprocessing drives me to apply for the WFHSS EC Committee . I am passionate about supporting developing countries, where the transfer of knowledge and experience can make a difference in the lives of millions of patients.

At the same time, I have developed a solid professional career. My leadership in organizations such as SPECH and FELACEH, as well as my active participation in the WFHSS executive committee, have allowed me to establish a wide network of contacts internationally and to deeply understand the challenges and opportunities of the sector. As a teacher, I have trained numerous generations of professionals through active technological methodologies, thus contributing to these professionals acquiring the necessary tools to guarantee patient safety.

I am convinced that my experience, my passion for education, communication and my commitment to excellence will allow me to contribute significantly to the fortification of the WFHSS and the achievement of its strategic objectives.

Greetings sincerely
