

守护无菌防线 护航医疗安全

Maintaining Sterility, Ensuring Patient Safety

--荆州市中心医院消毒供应中心举办 2026 世界灭菌日·消毒供应中心开放日活动

Open Day Event Hosted by the CSSD of Jingzhou Central Hospital

为迎接 2026 年世界灭菌科学日，搭建消毒供应中心与临床科室互联互通的桥梁，强化医院感染防控全链条管理，4 月 10 日，荆州市中心医院消毒供应中心成功举办“无菌守护 共筑安全”开放日主题活动。副院长薛君力出席活动，医务科、护理部、院感科、医学装备科及手术室、急诊科、外科、眼科、口腔科等 20 余个临床科室负责人、护士长及骨干代表共同参与。

To celebrate the 2026 International Day of Sterilisation Sciences and to strengthen collaboration between the Central Sterile Supply Department (CSSD) and clinical departments, while enhancing infection prevention and control, the CSSD of Jingzhou Central Hospital held an Open Day event on April 10 under the theme “Maintaining Sterility, Ensuring Patient Safety.” Vice President Xue Junli attended the event, along with representatives from over 20 departments, including the Medical Affairs Office, Nursing Department, Infection Control Department, Medical Equipment Department, as well as the operating room, emergency department, general surgery, ophthalmology, and stomatology.

活动由消毒供应中心护士长周红琼主持，在薛君力副院长致辞中拉开帷幕。薛院长指出，消毒供应中心是医院感控核心阵地及临床安全的坚强后盾，承担全院可复用器械清洗、消毒、灭菌与供应的重任，直接关系医疗质量与患者安全。希望以此次开放日为契机，进一步深化多学科协作，持续提升消毒供应专业标准化、规范化、智慧化水平，为医院高质量发展筑牢安全根基。

The event was hosted by Zhou Hongqiong, Head Nurse of the CSSD, and Vice President Xue Junli gave an opening speech. In his speech, he noted that the CSSD plays a vital role in infection prevention and control and is essential to clinical safety. Responsible for the cleaning, disinfection, sterilization, and supply of reusable medical devices, its work directly impacts medical quality and

patient safety. He added that the CSSD will continue to strengthen multidisciplinary collaboration and advance more standardized and digitalized practices, providing strong support for the hospital's high-quality development.

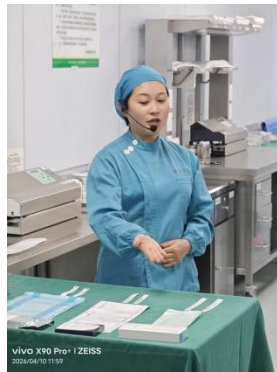

本次开放日以“沉浸式体验、全流程展示、零距离沟通”为特色，全面展现科室建设成果。作为建筑面积达 2890 m²的现代化消毒供应中心，科室严格遵循“物流由污到洁、气流由洁到污”原则，实行四区四通道科学布局，层流净化系统 24 小时保障环境安全。从 1958 年建院之初的简易蒸煮，到如今集精密器械处理、智慧化信息追溯、区域辐射于一体的行业标杆，科室牵头成立了荆州市消毒供应专科联盟并成为理事长单位，在医院和护理部的大力支持下获批湖北省首批消毒供应专科护士实践培训基地，并成功申报为国家消毒供应质控平台哨点医院，专业能力获省级与国家级双重认可。

The Open Day featured immersive experiences, full-process demonstrations, and direct interaction, offering a comprehensive overview of the department's development. The CSSD, with a total area of 2,890 square meters, is designed based on unidirectional workflow and controlled airflow, with a four-zone, four-channel layout. A laminar airflow system operates around the clock to maintain a safe environment. Since its establishment in 1958—from simple boiling to advanced instrument processing, digital traceability, and regional service capacity—the CSSD has become a leading model in the field. The department has led the establishment of the Jingzhou CSSD Specialty Alliance and serves as its chair unit. With strong support from the hospital and the Nursing Department, it has been approved as one of the first provincial training bases for CSSD specialist nurses in Hubei Province and has been designated as a sentinel site for the national CSSD quality control platform, with its expertise recognized at both provincial and national levels.

参观现场，腔镜器械“镜中镜”检测、绝缘安全筛查、规范包装操作、灭菌质量监测、扫码追溯发放、纯化水检测、清洗精准配对等实景演示与互动体验，让临床代表直观感受从器械回收、清洗消毒、检查包装、灭菌储存到发放的全闭环管理。每一把器械的“蜕变重生”，每一道流程的严格把控，每一项细节的精益求精，充分彰显消供团队“标准、规范、严谨、奉献”的职业精神。

During the visit, participants engaged in live demonstrations and hands-on activities, including inspection using borescopes, insulation testing, standardized packaging, sterilization monitoring, barcode-based traceability and distribution, purified water testing, and precision matching in cleaning processes. These activities provided a clear view of the whole procedures—from instrument collection and decontamination to inspection, packaging, sterilization, storage, and distribution. Each carefully controlled step, together with meticulous attention to detail, highlighted the CSSD team’s commitment to high standards, precision, and professionalism.

互动交流环节，临床科室主任、护士长纷纷点赞科室精细化管理与专业化服务，表示通过开放日彻底打破认知壁垒，深刻理解消供工作的重要价值。院感科杨雨科长在总结中强调，消毒供应中心是感控第一道关口，本次活动有效促进临床与保障科室协同共进，希望科室持续发挥示范引领作用，守护全院无菌防线。

During the discussion session, department directors and head nurses commended the CSSD for its strong management practices and professional support. They noted that the Open Day offered a clearer understanding of the department's critical role. Yang Yu, Director of the Infection Control Department, emphasized in her closing remarks that the CSSD plays a key role in infection prevention. She noted that the event helped strengthen collaboration between clinical and support teams and encouraged the CSSD to continue its leadership in protecting patient safety.

一把器械，十道工序；一方阵地，一生坚守。消毒供应中心将始终秉持“甘当绿叶、服务临床”宗旨，以更高标准、更严要求、更优服务，坚守感控底线，护航生命安全，为医院医疗质量持续提升贡献消供力量。

Each instrument goes through multiple steps, reflecting the care and precision behind every stage of the process. The CSSD remains committed to supporting clinical care with professionalism and reliability. By maintaining high standards, strengthening quality assurance, and continuously improving its services, the department will continue to support infection prevention and contribute to safer, higher-quality patient care.
