In his closing speech, Party Secretary Liu Yongbin commended the CSSD team for their essential contributions. He emphasized that, as a key support department, the CSSD plays a vital role in hospital operations and patient safety. He highlighted the need for the CSSD to evolve

from a support function into a more specialized discipline, with a stronger focus on end-to-end management. He encouraged closer alignment with clinical needs, more effective communication, and continuous improvement in service delivery while maintaining high standards. He also underscored the importance of proper instrument handling, calling on clinical staff to handle surgical instruments with the same level of care applied to patient safety, and to maintain open communication with the CSSD to support coordinated improvement across the hospital.
