

成都第一骨科医院成功举办

第 10 届 “世界灭菌科学日·消供开放日”活动

The No. 1 Orthopedics Hospital of Chengdu Successfully Hosts the 10th "International Day of Sterilisation Sciences • Sterile Supply Open Day"

Event

供稿 | 成都第一骨科医院消毒供应中心护士长唐红花

By Tang Honghua: Head Nurse of the CSSD of No. 1

Orthopedics Hospital of Chengdu

为积极响应世界灭菌科学联盟（WFHSS）号召，进一步加强消毒供应中心与临床科室的沟通协作，夯实护理服务质量与医疗安全保障，成都第一骨科医院于 2026 年 4 月 21 日 14:00-17:00，成功举办“科学灭菌 无菌护航 开放“供”赢”为主题的第十届“世界科学灭菌日·消供开放日”活动。本次活动由成都第一骨科医院主办，成都市消毒供应医疗质量控制中心、成都市消毒协会、四川天府新区医学交流促进会消毒供应专业委员会、中国卫生监督协会消毒与感染控制专业委员会基层医疗机构消毒供应工作组联合协办。

In response to the call of the World Federation for Sterilization Sciences (WFHSS), and to further strengthen communication and collaboration between the Central Sterile Supply Department (CSSD) and clinical departments, thereby solidifying the quality of nursing services and medical safety, No. 1 Orthopedics Hospital of Chengdu successfully held its 10th "International Day of Sterilisation Science • Sterile Supply Open Day" event on April 21, 2026, from 2:00 to 5:00, with the theme "Scientific Sterilization, Patients Protection, Open for Success". This event was hosted by No. 1 Orthopedics Hospital of Chengdul and co-organized by the Chengdu CSSD Quality Control Center, Chengdu Disinfection Association, CSSD Professional Committee of Sichuan Tianfu New Area Medical Exchange and Promotion Association, and the CSSD Working Group for Primary Healthcare Institutions of the Disinfection and Infection Control Committee of the China Health Inspection Association.

医院护理部副主任黄智琼、各临床科室护士长及护士共计 30 余人参加本次活动。活动围绕器械预处理行业规范、灭菌包质量识别、外来医疗器械、口腔专科器械预处理难点等内容，开展深度交流与实操互动，全力打通临床与消供协作壁垒。

More than 30 people, including Huang Zhiqiong, Deputy Director of the Nursing Department, head nurses and nurses from various clinical departments, participated in the event. The event focused on industry standards for instrument pretreatment, quality identification of sterilization packs, loaners, and challenges in the pretreatment of dental instruments. It facilitated in-depth exchanges and hands-on practice, aiming to break down barriers between clinical practice and the Central Sterile Supply Department (CSSD).

瞄准定位 凝聚共识

Targeting Key Roles and Building Consensus

黄智琼副主任在致辞中充分肯定消毒供应中心的工作成效，强调其作为医院感染防控“心脏”与“堡垒”的关键作用，指出每一项工作都直接关系患者安全与全院医疗质量底线。

Deputy Director Huang Zhiqiong, in her opening remarks, fully affirmed the achievements of the CSSD, emphasizing its crucial role as the "heart" and "fortress" of hospital infection control, pointing out that every aspect of its work directly relates to patient safety and the overall hospital's medical quality standards.

专题授课 破解痛点

Specialized Lectures Addressing Pain Points

消毒供应中心护士长唐红花以“世界灭菌科学日”的设立意义破题，开展互动授课，深入讲解器械现场预处理的重要性与规范操作流程，针对临床预处理“知易行难”的痛点，引导大家转变理念，实现从认知到行动的知行合一，强化跨科室协作意识，达成共识。

Head Nurse Tang Honghua of the CSSD began by highlighting the significance of "International Day of Sterilisation Science", arranging interactive lectures to explain the importance and standardized operating procedures of point-of-use pretreatment. Addressing the challenge of "easy to know, hard to do" in clinical pretreatment, she guided participants to shift their mindset, achieving a unity of knowledge and action, strengthening interdepartmental collaboration, and reaching a consensus.

实操演示 严把质量

Practical Demonstration & Strict Quality Control:

骨干柏金莉现场展示高温、低温灭菌包合格判定要点,通过化学指示物对比教学和互动抽问,强化对不合格灭菌包的识别能力,并赠送小礼品提升学习氛围,实现理论与实践融合。

Key staff member Bai Jinli demonstrated key points for judging the quality of high-temperature and low-temperature sterilization packages. Through comparative teaching with chemical indicators and interactive questioning, she strengthened the ability to identify substandard sterilization packages. Small gifts were given to enhance the learning atmosphere, integrating theory and practice.

双向沟通 深入临床

Two-Way Communication & In-Depth Clinical Understanding:

柏金莉、李黎明两位骨干前往口腔科，现场演示牙椅手机头、洁牙机头及精细器械的标准化预处理，讲解保湿剂选择等要点。双方深入交流，就专科器械处理流程达成共识，实现双向赋能。

Senior staff Bai Jinli and Li Liming visited the Department of Stomatology, demonstrating standardized pretreatment of handpieces, scaler heads, and fine instruments, explaining key points such as the selection of moisturizers. Both sides engaged in in-depth exchanges, reaching a consensus on the handling procedures for specialized instruments, achieving mutual empowerment.

实地观摩 展现专业

On-Site Observation & Professional Demonstration:

在唐红花护士长的带领下，参会人员实地参观消毒供应中心工作区域。去污区骨干王丽莎详细介绍了去污区建筑布局、设备设施及可重复使用器械全流程，并现场演示口腔器械、外来医疗管腔器械、中医诊疗器具等重点器械的预处理操作，让临床人员直观了解消供工作的严谨性与专业性。

Led by Head Nurse Tang Honghua, participants toured the CSSD. Senior staff Wang Lisha from the decontamination area provided a detailed introduction to the building layout, equipment, facilities, and the entire process of reusable instruments. She also demonstrated the pretreatment of instruments such as dental instruments, loaner instruments with channels, and traditional Chinese medicine diagnostic instruments, allowing clinical staff to intuitively understand the rigor and professionalism of the CSSD work.

总结展望 筑牢防线

Summary and Outlook: Strengthening the Defenses

此次开放日活动,有效促进了临床科室与消毒供应中心在器械预处理工作上达成思想与行动双重共识,在质量安全管控方面共同守住安全底线,凝聚了院感防控工作合力。下一步,消毒供应中心将推动开放日活动常态化开展,不断优化跨科室协作流程,全力筑牢医院感染防控安全防线,助力提升医院整体医疗质量。

This open day event effectively fostered a shared understanding and practical cooperation between clinical departments and the CSSD regarding instrument pretreatment. It ensured joint adherence to quality and safety control, and strengthened the collaborative efforts in infection control. Moving forward, the CSSD will promote the regular implementation of open day events, continuously optimize cross-departmental collaboration processes, and strive to solidify the hospital's infection control defenses, thereby contributing to the overall improvement of the medical quality.
