

## International Day of Sterilisation Sciences CSSD Open House Day, Anshun People's Hospital

Before the approach of International Day of Sterilisation Sciences on April 10th, Anshun People's Hospital held CSSD open house day activity.

Medical workers from different departments were invited to visit CSSD where they were impressed by advanced devices such as integrated washing station, automatic washer-disinfector, imported high-temperature and low-temperature sterilizers. Through this visit, they renewed their understanding about the management of CSSD and the process of standardized cleaning, disinfection and sterilization.

Visitors were also impressed by the rigorous attitude and professional skills of CSSD workers. In addition, clinical front-line healthcare workers got a new and deep understanding of CSSD which boost communication and friendship between different departments.

CSSD will stick to providing quality disinfection and sterilization service with professionalism to safeguard medical safety.

**Hou Yili CSSD, Manager of Anshun People’s Hospital**

In response to Sciences of sterilization’s day, our CSSD was opened to the hospital to provide an inside look into the working environment and process of CSSD. In this way, medical workers can have a better understanding of our work and provide valuable comments and suggestions to help us improve reprocessing quality.
