Committee Member of CSSD Group of National Primary Medical Institution

Chengdu Fifth People's Hospital,

CSSD Group of Sichuan Primary Medical Institution

The CSSD of Chengdu Fifth People's Hospital currently has 33 staff members, including 14 nursing staff, 7 technicians (3 disinfection workers), and 12 staff from outsourcing companies. The CSSD is equipped with 4 various sets of washers, 4 sets of endoscope reprocessing workstations, 3 sets of high-temperature sterilizers, 2 sets of low-temperature ethylene oxide sterilizers, 2 sets of low-temperature hydrogen peroxide sterilizers, 7 BI incubators, and 2 sealing machines for peel-pouches. All the items can be fully traced with informatization management.

Our commitment on high-quality service: Standard Operation Promotes Professional Development; Satisfy Clinics, Satisfy Departments, Satisfy Users, and Satisfy Hospitals.

Our aim: Safety, Efficiency, High-quality, Assurance.

We are committed to provide high-quality services by standardized reprocessing for professional development, for the satisfaction of customers, for the satisfaction of end-users, patients and our hospital.

Our mission is safety, effectiveness, high-quality and peace of mind.

April 10th, 2022 is the 6th International Day of Sterilisation Sciences. Chengdu Fifth People's Hospital filmed a TikTok video with the theme of "Unveiling the Myths of CSSD, Building the Road of Cooperation", guiding us to take a closer look at hospital's CSSD.

The CSSD is responsible for the cleaning, packaging, sterilization and supply of all reusable medical devices in the hospital. There are a wide variety of sterilization items, with many different departments involved and high turnover rate. The CSSD is a department that provides quality and safety assurance for clinical departments and every task of every position is closely related to medical quality and safety and hospital's infection prevention and control. Before the instrument can be used again, it has to go through three different areas in CSSD and be processed by many CSSD staff, from recycling to classification, soaking, cleaning, disinfection, drying, lubrication and care, inspection and packaging, sterilization, storage and distribution. Let's feel the smiles from every staff in the CSSD together!
