

## Fuyang Women and Children's Hospital

### Tracing the Path: The Journey of Instruments from the CSSD to Clinical Departments

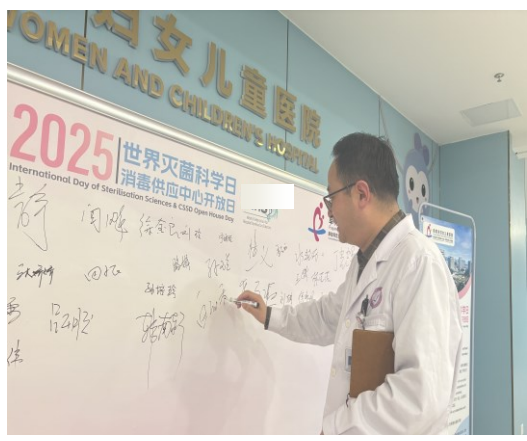

The World Federation for Hospital Sterilisation Sciences (WFHSS) sets up the International Day of Sterilisation Sciences on April 10. On this day, it calls on global sterile supply centers to open their doors to the public, promoting the entire process of instrument reprocessing and related sterilization knowledge.

In response to this call, the Central Sterile Supply Department(CSSD) of Fuyang Women and Children's Hospital held an event on the afternoon of April 8, 2025, themed "Tracing the Path: The Journey of Instruments from the CSSD to Clinical Departments."

With strong support from the Nursing Department and the Infection Control Department of Fuyang Women and Children's Hospital, more than 50 participants, including the hospital's president Jiang Nailiang, vice president Bai Yunbao, president assistant Wang Weilin, director of the nursing department Lv Chaolan, director of the infection control department Tian Xiaofei, and directors and nurses from surgical and related departments (including the internal medicine department performing interventional surgeries).

#### Sign-in

President Jiang Nailiang of Fuyang Women and Children’s Hospital’s said in his speech: "The Central Sterile Supply Department, as an important department within the hospital, bears the mission of ensuring medical safety and preventing hospital-acquired infections. We always adhere to a patient-centered approach and the philosophy that quality is our lifeblood. We continuously enhance the professionalism and standardization of sterilization, dedicated to providing safe and efficient sterile services for our patients."

The head nurse of the CSSD introduced the environmental layout, equipment and facilities, workflow, quality control, and the achievements of the department through a multimedia presentation.

**Watch the video: The Life Journey of Instruments.**

To practice standard operating procedures, Xie Bingqing and Wu Xiaorong from the CSSD demonstrated the inspection and packaging for rigid endoscopes.

Showing materials and consumables used in the CSSD

Wang Weilin praised the importance of CSSD in the safety of surgical operations and provided practical and feasible improvement plans for the quality control of the CSSD.

Director of the Infection Control Department of Fuyang Women and Children's Hospital, Tian Xiaofei, summarized: "Sterilization is the cornerstone of infection prevention and control in hospitals. Every surgical knife, every hemostatic clamp, and every invasive instrument must undergo strict sterile processing. Only by ensuring the sterile status of each instrument can we allow doctors to perform treatments with confidence and patients to entrust their life, thereby ensuring medical safety."

Through today's event, the CSSD staff showed the professional system of sterile supply and the standardized operating procedures that encompass cleaning, disinfection, sterilization, and monitoring. More clinical medical personnel became aware of the standardization and rigor of sterile supply and the importance of sterilization science, deepening the communication and exchange between the CSSD and clinical departments.

In the future, we will continue to strive for scientific advancement and technological innovation to ensure the safety and quality control of the entire reprocessing process.

We are advancing along the path of safeguarding instrument safety...
