

The International Day of Sterilisation Sciences: Take You to Have a Closer Look at CSSD

The World Federation for Hospital Sterilisation Sciences (WFHSS) sets up the International Day of Sterilisation Sciences on April 10. The theme is Sterilization Matters to Everyone and our Health. The CSSD of Fuyang Women and Children's Hospital actively responded to the call and held an open house event on April 10, 2024. The theme of the event was "Care for Patient Safety, Sterilization Protects Everyone."

Sign-in for The International Day of Sterilisation Sciences

This open day event was not only open to medical staff in clinical departments within the hospital, but also invited representatives from grassroots medical institutions and private hospitals in Yingzhou District. The purpose was to let everyone understand the work process of CSSD through visits and exchanges, deepen mutual understanding and trust through mutual communication, and promote the safety and effectiveness of the supply and use of sterile items.

Bai Yunbao, member of the Party Committee and Deputy Dean of the hospital, delivered a speech

Li Jing, head nurse of No. 2 CSSD, gave an introduction

Under the guidance of the instructors, everyone walked into the spacious, bright, clean and beautiful work areas.

Pieces of advanced and high-end modern equipment, automatic washers, high-temperature and low-temperature sterilizers were displayed in front of everyone, fully demonstrating the returning, cleaning, disinfection, inspection, packaging, sterilization, and distribution of

instruments and items.

In addition, in order to let everyone fully understand the effectiveness and safety of the supply and use of sterile items, the event also added an interactive session. Visitors were invited to actively ask questions and we provided answers.

After the visit, the head nurses of each department enthusiastically put forward targeted suggestions, and wrote their ardent expectations and sincere blessings on the wish cards.

Lv Chaolan, director of the Nursing Department, made a concluding speech

Through this open day event, leaders and head nurses of various departments learned about the processing procedures of reusable medical devices, which deepened the understanding and also promoted the work of both supply and demand parties.

Sterilization matters to the health and ensures safety. The entire hospital will continue to work together to for patient safety.

The CSSD is responsible for the cleaning, disinfection, sterilization and supply of all reusable medical devices and items in the hospital. It is a key department for preventing nosocomial infections and ensuring medical safety and quality, and is the "heart" of the hospital. The CSSD of Fuyang Women and Children's Hospital was formally established at the end of 2010 and officially launched in 2011. Currently, the CSSD of our hospital can handle 971 packages of instruments every day, providing strong support for surgeries and clinical medical care.
