

"Communication and Innovation Empower Development"

Documentary of the The 8th International Day of Sterilisation Sciences

CSSD Open Day Event in the Jianyang Maternal and Child Health Hospital

By: Ji Dan from the Jianyang Maternal and Child Health Hospital

The CSSD successfully hold the International Day of Sterilisation Sciences CSSD Open

Day event

In response to the call of the The World Federation for Hospital Sterilisation Sciences (WFHSS), on April 10th, Jianyang Maternal and Child Health Hospital held the

"International Day of Sterilisation Sciences ·CSSD Open Day" event with the theme of "Communication and Innovation Empower Development." The purpose of this event is to enable clinical staff to understand the disinfection supply, thereby enhancing communication and collaboration between departments, jointly promoting the improvement of work quality, and ensuring patient safety.

The event invited the heads of the nursing department, infection control department, as well as head nurses of maternity and child health department, women's health department, children's health department, and operation room to participate. The event was hosted by the deputy nursing supervisor of the CSSD, Ji Dan, and was conducted through various forms such as theoretical explanations, on-site visits, and interactions.

▲ Signing Event

In the Inspection, Packing and Sterilization Area, Ji Dan elaborated on the division of the area, working procedures, technical points and sterilization quality monitoring requirements. The department staff demonstrated the packing on site.

▲ Detailed Explanation

In the Sterile Storage Area, Ji Dan introduced the unloading process, storage requirements, and distribution of sterile items, and demonstrated the use of the traceability system.

▲ Detailed Explanation

In the Demonstration Area, Ji Dan focused on the classification, cleaning, disinfection, and drying process in this area after recycled from the clinical department, emphasizing the importance of occupational protection when working in the area.

▲ Demonstration Area

At the end of the event, the Director of the Nursing Department, Tao Liuting, and the Director of the Hospital Infection Department, Ding Wei, summarized the event. They highly praised the significance and effectiveness of this open day event, believing that it not only shows the proficiency and work achievements of the CSSD, but also strengthens

communication and collaboration between departments. At the same time, they also put forward suggestions for the problems found in the activity, pointing out the direction for future work.

▲ Event Summary

It is the first "International Day of Sterilisation Sciences ·CSSD Open Day" event held by the hospital. Although there are some shortcomings, it is still considered a complete success. The hospital will take this as an opportunity to establish closer communication between clinical departments and the CSSD, continuously improve proficiency and service quality, and safeguard the health and safety of women and children.
