

## Sterile Supply Mission of CSSD

### -- International Day of Sterilisation Sciences

### by the CSSD of Shanghai Changhai Hospital

In the most beautiful April day, peach blossoms and rain drizzles.

Enjoying flowers' competition, one can smell the fragrance of from Changhai CSSD.

World Federation for Hospital Sterilisation Sciences (WFHSS) establishes the "World Sterilization Science Day" on April 10 every year, calling on the CSSDs of hospitals in various countries around the world to open their departments to the public on this day, and hospital colleagues are invited to visit the CSSD. On April 9, 2021, the CSSD of Shanghai Changhai Hospital actively responded to the call initiated by WFHSS and held an open house day event with the theme of *Sterile Supply Mission Escorted by CSSD*, which was warmly welcomed by hospital leaders and colleagues throughout the hospital.

(International Day of Sterilisation Sciences event

with the theme of *Sterile Supply Mission of CSSD*)

On the afternoon of April 9th, all the staffs of the CSSD launched this sterile supply journey for the guests. The event was divided into three time periods and lasted more than 3 hours. A total of more than 60 directors, professors and head nurses from the whole hospital participated in the event, and more than 100 publicity materials were distributed on the spot.

After signing in and taking a group photo, the visiting guests entered the decontamination area, inspection and packaging area, sterilization area, and sterile supply distribution area one by one, and had a deep understanding of the work responsibilities, work specifications and standard processes of the CSSD. In the inspection and packaging area, the guests also operated the packaging of surgical instruments on the spot under the guidance of the CSSD staffs, and experienced the spirit of CSSD, namely reducing the complexity to simplification, simplification to refinement, and refinement to specialty and paying attention to every detail.

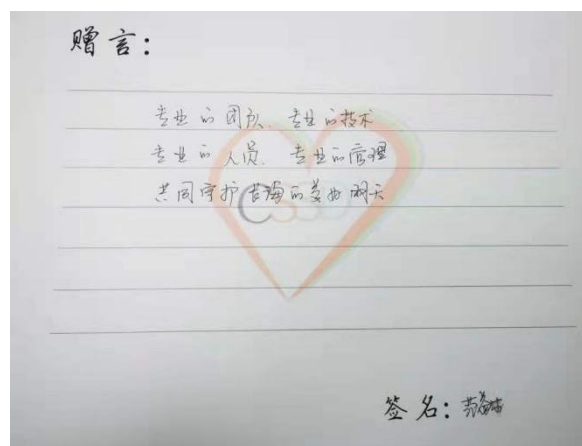

After the visit, the guests expressed their full recognition and respect for the open house day activities and the work of the CSSD, and they wrote down their thoughts and suggestions for the visit. The event also invited three former directors and old employees of the CSSD to conduct discussion.

Together to guard the bright future of Changhai)

This event further deepened everyone's understanding of the CSSD's work, and knew what work this department, which considered as the "heart" of hospital infection control and the "pulse" of patient safety, has done unknown to public. At the same time, mutual communication and collaboration have been strengthened, laying a foundation for further improving the quality of sterile supply, thereby ensuring the medical safety of patients.

## Professional team

在事件中磨练，在磨练中思考，  
在思考中学习，在学习中成长。

## Technological development

**专业技术**  
心系患者安全，铸就专业品质

从临床回收再次使用，每个环节紧密连接，环环相扣，层层递进，逐步净化，其工作流程贯穿于回收-分类-清洗-干燥-消毒-包装-灭菌-储存-发放-监测等十大技术之中。

## Professional skills

科技的进步  
医学技术的飞速发展  
CSSD技术复杂性持续增加  
器械处理流程越来越复杂  
器械处理的难度不断加大

CSSD在不断的交流、学习、实践中  
确保了每位患者享受到高质量医疗器械的保障。

## Professional layout

**专业布局**

- ▶ 布局合理，符合物流、人流、气流洁污分开的消毒隔离管理原则。
- ▶ 设有专用污染出入口、清洁出入口、无菌物品出入口、工作人员出入口，物品流动符合单向流程的原则，由污至洁，不逆行不交叉，呈污染递减逐渐净化的过程，从而确保消毒供应科的再处理工作质量达到高水平标准。
