

Walk into CSSD on International Day of Sterilisation Sciences

Suzhou First People's Hospital

WFHSS celebrates International Day of Sterilisation Sciences on April 10th each year and calls for CSSDs around the world to open their department to promote the whole process of instrument reprocessing and relevant sterilization knowledge. Through banners, display boards, field visit, PPT presentation and interactive communication, people can have a better understanding of CSSD and promote the safety and efficiency in using sterile supplies.

Under the support of the director of hospital and nursing department, CSSD held the open day activity whose theme is “Walk into CSSD on International Day of Sterilisation Sciences”.

At 3 pm on April 7th, leadership and peer workers dressed up and walked into CSSD. Head nurse Jiang Cuiling delivered opening speech and gave a brief introduction about the aim and content of open house day.

Liu Xuemei, head nurse of CSSD gave warm welcome to the participation of medical workers. She introduced the layout, management, equipment and work process to visitors through PPT.

CSSD mentor Zhang Xiaoman showed visitors around the CSSD and introduced the processing of received surgical instrument, the uses of various kinds of devices, and the inspection, sterilization, storage and distribution of instrument.

After the visit, leadership and medical workers had a discussion on the work in CSSD and raised suggestions on improving reprocessing quality.

Li Xiujun, director of the hospital, made conclusion and applauded this activity. Li praised the work of CSSD and gave guidance to long-term work.

In the end, all participants took a group photo together. Though the activity is short, CSSD gained the trust and confidence of more medical workers. With the rapid development of medical service, more and more responsibilities are put on the shoulders of CSSD. CSSD will keep improving its service and strive to create a new chapter for our department.
