The World Federation for Hospital Sterilisation Sciences (WFHSS) designates April 10 as the International Day of Sterilisation Sciences, calling on the global CSSDs to open their doors and spread the knowledge on the reprocessing of reusable medical devices and related sterilization sciences. In response to the call of the The World Federation for Hospital Sterilisation Sciences (WFHSS), on April 8th, the First Veterans Hospital of Sichuan Province held the "International Day of Sterilisation Sciences · CSSD Open Day" event with the theme of "Communication and Innovation Empower Development." This event is co-organized by the CSSD group of Sterilization and Infection Control Professional Committee of China Health Inspection Association.

Sign-in

Opening Ceremony

The event was hosted by the Director of the Nursing Department. Yang Li, the vice dean delivered the opening speech. Yang Li said that the sterile items provided by the CSSD is related to the patient safety. She hoped that this event will build a communication bridge for clinical departments and the CSSD, jointly safeguarding patient safety.

Yang Li

Book-giving Ceremony

This hospital is a pairing-of the General Hospital of Western Theater, Command PLA. They provided us assistance, guidance and improvement to our business. This event invited Shuai Jing, the head nurse of the CSSD at the General Hospital of Western Theater, Command PLA. She brought us a book *Training Guidance for Sterile Supply Personnel*.

Lecture - The importance of instructions

In order to make everyone aware of the importance of instructions of instruments, we arranged a lecture for participants. Wu Yingqin explained the importance of instrument instructions, letting everyone understand why the instruments should be valued and followed, especially for functional departments. Functional departments must distribute new devices together with their instruments.

Veterans Museum Visiting

The Sichuan Veterans Museum is established based on the Honorary Hall of the Sichuan Revolutionary Disable Armyman Rehab. It has a long history and outstanding features. It is the first museum in China with the theme of honoring military personnel, a patriotic education base at the provincial and municipal levels, and a provincial defense education base. It has made important contributions to the construction of spiritual civilization and public cultural services throughout the province. The resilient will, tenacious vitality, and optimistic attitude of the veterans inspire us to constantly strive for progress. Taking advantage of this Open Day event, we have arranged a visit to the Veterans Museum, allowing everyone to receive patriotic education while participating in the CSSD Open Day event.

Onsite Visit-Patient Group

The department staff led patients and their families to visit the sterile storage area, inspection, packing and sterilization area, and decontamination area, allowing them to understand the workflow, facilities, and equipment of the CSSD. Through open day activities, patients and their families learned how this "mysterious" department reprocess instruments in a standardized, scientific, safe, and efficient way!

Onsite Visit-Staff Group

Sterile Storage Area:

The staff explained to everyone the environmental requirements of the area, the unloading of sterilized items, and the distribution process of sterilized items.

Inspection, Packing and Sterilization Area:

The staff explained to everyone the area division, daily workflow, operational technical requirements, and precautions in this area.

Decontamination Area:

Everyone visited the recycling, classification, cleaning, and disinfection processes of reusable instruments from clinical departments, operating rooms to the CSSD. The CSSD staff emphasized the importance of pretreatment. Everyone exchanged opinions with each other.

Face to Face Session

After the visit, the head nurse of the department, Wu Yingqin, had in-depth discussions with the experts regarding the current issues of "satisfaction survey" and "implementation of new standards". The experts brought their innovative working methods, which benefited us greatly.

This open day event is the second CSSD Open Day event of the First Veterans Hospital of Sichuan Province. This event allow patients and clinical departments to enter the CSSD, which helps to build a bridge for communication between both parties.

Group Photo

Behind every instrument, there is a fresh life. The staff of the CSSD should always remember their mission, strictly adhere to regulations, and follow guidelines.
