

Unveiling the myths of CSSD, Building a way of Cooperation

The International Day of Sterilisation Sciences - CSSD Open Day

By Shuai Jing, Liu Maoyu from CSSD of

The General Hospital of Western Theater, Command PLA

Member of CSSD Group of Sichuan Primary Medical Institution

In this April, we welcomed the sixth "International Day of Sterilisation Sciences". To prevent and control the epidemic and ensure patient safety, as well as answer the call of the WFHSS, The General Hospital of Western Theater, Command PLA held a CSSD Open Day with the theme of "Unveiling the Myths of CSSD, Building a Way of Cooperation" on 15 April.

More than 60 people, including clinical department directors, head nurses and specialists entered the CSSD to visit the whole processing process and deepen mutual understanding and trust through interactive communication.

Shuai Jing, a member of CSSD Group of Sichuan Primary Medical Institution and the head nurse of CSSD in The General Hospital of Western Theater, Command PLA explained the significance of this activity and the development, ideas and measures of disinfection and supply in recent years.

Guided by interpreters, visitors were divided into two groups to visit the three working areas to see the 10 reprocessing procedures and more than 30 processing steps of reusable medical instruments in the CSSD.

At the Decontamination Area: Chen Yu and Tang Lanxuan explained instrument collecting, classification, cleaning, disinfection and drying as well as processors and washers.

At the Inspection, Packing and Sterilization Area: Ren Jia and Gao Luna introduced the inspection, maintenance, packing and other processes of the instrument.

At the Sterile Storage Area: Yin Wen explained the unloading, storage, distribution and other processes of sterile goods.

At the same time, we have set up three booths and one process. Yu Jing, Tu Jiajia and Zeng min demonstrated the functions and use methods of automatic washers and insulation monitors and introduced the characteristics and identification methods of instrument packing materials and sterilization monitoring consumables.

During the activity, the staff of the CSSD answered the questions raised by the visitors in detail.

After visiting, the visitors spoke highly of the rigorous work style, solid professional ability and positive attitude of the CSSD, and put forward opinions and suggestions on the future work of the CSSD.

The CSSD closely follows the pace of development, carries out scientific and information management, and realizes the centralized management mode. The staff are young and professional, and the equipment is automatic and advanced. As a key department of infection prevention and control, it lays a solid foundation for ensuring the quality of sterile goods and provides a strong guarantee for the medical quality and safety of the hospital. The CSSD can't development without the support the hospital, the mutual cooperation and communication of clinical departments and the efforts of all staff. The CSSD will promote development and spare no effort to support clinical departments.
