

Walk into CSSD to Secure the Line of Defense

In order to actively respond to the call of the World Federation for Hospital Sterilisation Sciences (WFHSS), Yixing People's Hospital successfully held an open day event for the CSSD with the theme of "Professionalism, Safety, Trust and Health" on April 3, 2024. This event aimed to deepen the public's understanding of the CSSD and improve the safety and effectiveness of the supply and use of sterile items.

For this event, CSSD sincerely invited Dean Wu Jundong, Deputy Dean Guo Junping, Director of Orthopedics Department Wang Qiang, Director of Brain Surgery Department Wu Da, Director of Urology Department Qin Zhenqian, Director of Infection Management Department Jiang Bijun, Deputy Director of Nursing Department Lu Hong, etc. to visit and provide guidance.

CSSD staff showed guests around the site and introduced the basic overview, advanced equipment, facilities and work processes.

Afterwards, visitors took a closer look at various practices, including the cleaning, disinfection, packaging, sterilization, monitoring, and distribution of instruments, allowing visitors to feel the professionalism of CSSD work and the emphasis on the safety of instrument reprocessing. During the visit, the CSSD staff patiently answered the questions of the visitors one by one, and humbly asked the experts for knowledge about specialized instruments, and jointly discussed the development trends and challenges in the CSSD field,

which not only enhanced their understanding of clinical needs, but also laid a solid foundation for future collaboration.

This open day event not only demonstrated the professional strength, rigorous attitude, and scientific management of CSSD, but also allowed the public to have a deeper understanding of the scientific knowledge of instrument disinfection and sterilization. It also gained leaders and colleagues' appreciation. The unanimous affirmation showed trust and support for the work of CSSD.

The CSSD will, as always, adhere to the principles of rigor, professionalism, safety, and science, work together with the clinical departments to build a safety line of defense, and safeguard medical safety.
